Subject: Update from Connecticut Children's

As we all continue to respond and adjust to the COVID-19 pandemic, I wanted to make sure you were aware that Connecticut Children's continues to develop resources for parents, caregivers, and pediatricians. Below are some of the new resources that you may want to share with your constituents.

- As a reminder, Connecticut Children's has a coronavirus website with helpful information such as:
 - [Should My Child Wear a Facemask?](#)
 - [How to Make a Coping Toolbox](#)
 - [Creating Your Child's Ideal 'Home Office' for Distance Learning](#)
- Check out the Connecticut Children's YouTube Channel for additional resources like:
 - Building Resilience series with developmental pediatrician Dr. Rob Keder ([Introduction](#), [Episode 1](#))
 - [How to Set Up a Video Visit at Connecticut Children's](#)
- A huge thank you to the government officials who sent us short 'thank you' videos to share with our frontline healthcare workers. You can watch the video, [here](#).
