

### Mailbox Replacement Policy

The Town's policy regarding damage to mailboxes and/or posts during snowplowing operations is as follows:

The Town will replace mailboxes and/or posts only if it is actually struck by the snowplow. There must be physical contact between the plow and the mailbox and/or post. The Town will not replace mailboxes and/or posts constructed of inappropriate materials such as plastic and those damaged by the weight of the snow being discharged off the snowplow.

Residents are expected to maintain their mailbox and/or post in such a manner that it will withstand a New England winter and the pressure/impact of snow and ice cascading off the snowplow.
